Service Rules]	

**COMMENTS OF ITFS LICENSEE TEXAS STATE TECHNICAL COLLEGE
(HARLINGEN)**

Texas State Technical College (TSTC), Harlingen, Texas, Licensee of the “A” block of ITFS frequencies in the Brownsville Basic Trade Area (WNC 244) and the “A” block of ITFS frequencies in the McAllen Basic Trade Area (WNC 240) submits these comments in support of the “Proposal for Revising the MDS and ITFS Regulatory Regime” advanced by the Wireless Communications Association International, the National ITFS Association and the Catholic Television Network on October 7, 2002.

The Proposal offers significant remedies to a system that is broken-down, if not broken, and which is in need of significant fixing.

TSTC strongly believes that the use of ITFS frequencies to enhance educational services continues to be the FCC’s primary goal in seeking worthy stewards of its licenses.

The Proposal protects education-oriented licensees by ensuring that no spectrum will be lost and by removing regulatory restrictions which hinder the deployment of wireless broadband and other services.

TSTC applauds the Commission for seeking comment on the WCA/NIA/CTN Proposal which, in large measure, provides ITFS bandplan revisions and remedies that are long overdue.

Further, TSTC commends the three parties for submitting The Proposal and looks forward to participating alongside them as this process continues.

Respectfully Submitted,

/s/ Jon M. Schill

Consultant to Texas State Technical College (Harlingen)
